Powered by  **DART™** Dual Action
Rejuvenating
Technology

Model has not been treated with HARmonyCa®.

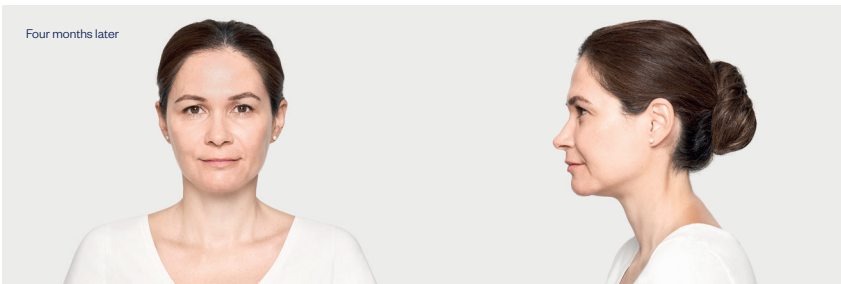

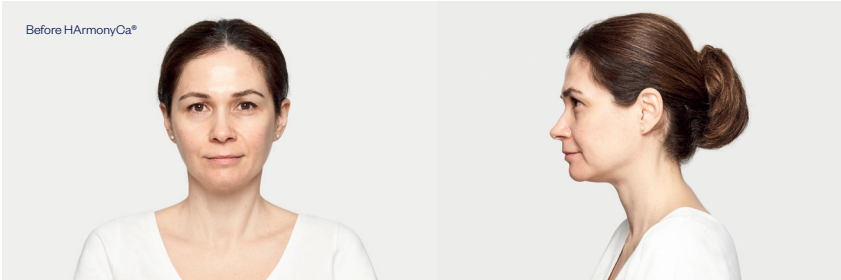

See a natural-looking improvement right away, with *firmer, smoother skin* that keeps improving over time³

HArmonyCa® (pronounced **har-MON-ih-kuh**) targets multiple signs of aging in one treatment, restoring firmness and elasticity.³

Actual HArmonyCa® Patient. Individual results may vary.

Natural-looking, long-lasting results³

Individual results may vary. Our model, Elisabeth, received a total of 5 mL of HArmonyCa® in the cheeks and jawline. She received complimentary treatment and was compensated for her participation and expenses. She may have also received other facial treatments.

After HArmonyCa® treatment, skin looks firmer, lifted, and tightened³

- Harness the body's natural ability to create collagen **for up to 18 months** with a 2-in-1 facial injectable that helps deliver an immediate, visible lift^{4,5}
- HArmonyCa® contains ingredients that are found naturally in your body, for **natural looking results**^{3,6,7}

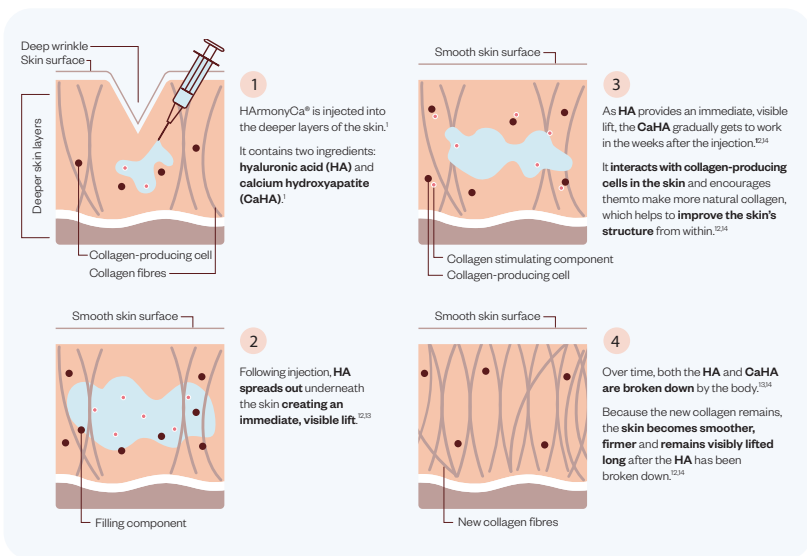

Ask your healthcare professional about how HArmonyCa®
can help achieve your aesthetic goals

Great skin starts with a strong foundation⁸

Aging skin gradually loses its structure and volume, in part due to decreased collagen production and water loss.⁹ As the body's ability to produce collagen slows down, skin loses firmness, elasticity, and volume, and this can begin to change how our skin looks on the outside too.^{10,11}

Aging doesn't look the same for everyone – changes may happen sooner or later for different people, and they may be more obvious in some areas than others.¹¹

How HArmonyCa[®] works

HArmonyCa[®] is powered by DART™ —Dual Action Rejuvenating Technology

HA works to provide an immediate lift, while **CaHA** continuously supports your body's natural collagen production—for **immediate and long-lasting results**.²

Join the over 90% of patients who saw ongoing visible improvements in their overall facial appearance²

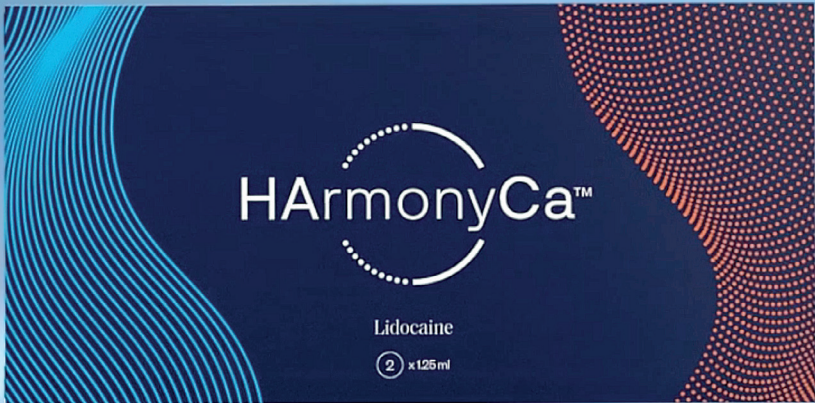

After a single HArmonyCa[®] treatment session, patients experienced long-lasting visible results and satisfaction.²

A study showed that 99% of patients had an overall aesthetic improvement at 1 month, with 76% maintaining it at 1 year.¹⁵

Actual HArmonyCa[®] Patient. Individual results may vary.

Enjoy immediate
and long-lasting results
with no downtime¹⁶

- HArmonyCa[®] is clinically tested and used worldwide, with a **proven safety history**.
- Contains lidocaine for comfortable injection experience—return to work and resume most activities **the same day as your treatment**.¹
- **Side effects are generally mild** and resolve within 1–2 days.¹⁷

Important Safety Information¹

HArmonyCa® Lidocaine is a dermal filler intended for facial soft tissue augmentation and should be injected into the deep dermal, sub-dermal, or supra-periosteal layers in the midface (cheek and malar areas), lateral face, and jawline. The lidocaine in the product is for reducing pain during treatment.

HArmonyCa® injection may be accompanied with mild discomfort; administration of anesthetics should be considered. As with all transcutaneous procedures, injection of HArmonyCa® carries a risk of infection. To reduce this risk, common practice of such procedures should be followed. If nodules appear, patient should massage the treated area. Patient should be informed that the injected material may be palpable for a long period after treatment. Common postoperative adverse events include erythema (redness), edema (swelling), pain, tenderness, itching, lumps or bumps, firmness, bruising, and discoloration. Treatment site reactions typically resolve within 24–48 hours and swelling within a week. Less common adverse events associated with dermal fillers in general and calcium hydroxyapatite-based fillers in particular include hematoma, seroma, extrusion, induration, skin pigmentation, fistula formation, inflammatory reaction, infection, allergic reaction, migration, persistent nodules, granulomas, fever, necrosis, and blindness.

Adverse events should be reported to Allergan Aesthetics, an AbbVie company, by emailing AGN-DL-AUSDermalInternationalComplaints@abbvie.com, or by calling 1-800-624-4261.
