

Business Intelligence BI Specialist

Position	Business Intelligence – BI Specialist
Location	India, Remote (Work from Anywhere in India)
Experience	5+ Years
Salary	Best in the Industry

General Description

Looking for an experienced ETL and Report /Visualization Developer using Tableau with very strong underlying concepts in database especially SQL.

Work Experience Required

- Hands-on experience of developing Business Intelligence Report / Visualization on Tableau
- Exposure to other reporting tools Power BI, Sisense, QlikView and SSRS is preferred
- Experience on any of the ETL tools like Azure Data Studio, Talend, SSIS and DBT
- Familiarity with SQL (or PLSQL) and should be able to write complex SQL queries
- Familiarity with optimizing SQL queries on millions of data tuples and should have experience in performance tuning for meeting required non-functional and performance requirements
- Prefer hands on experience in developing multi-dimensional data cubes and be able to do basic OLAP operations like Roll-up, Drill-down, Slice & Dice, Pivot, etc.
- Ability to choose and develop the right visualization for multi-variate data for meeting the business needs for:
 - Presenting the Distribution of Single Variable
 - Showing Relationship between two (or more) variables
 - Visualization the Composition of single or multiple variables
 - Demonstrate Comparison between Categories/Classes
 - Indication of trends and providing forecasts.

Educational Qualification

- Bachelor of Technology or Master's degree in Computer science or IT

Required Competencies

- Must have a passion to learn new tools/technologies and provide Business Intelligence solutions end to end as an individual contributor
- Ability to adapt and work in a fast-paced, creative and agile ecosystem
- Must have strong visual and verbal communication Skills
- Experience and desire to work in a global delivery model from a permanent work from home position

Core Competencies

Collaboration – Even though this may be an individual contributor role, success lies in ensuring that the individual is able to work collaboratively across levels and functions. The individual must communicate with peers and clients effectively and ensure timely closure of tasks

Outcome Oriented – Must ensure that the focus is not on hours of productivity but instead on outcomes delivered. The individual should constantly and consistently put effort to ensure goals are met in a timely fashion with high quality. Must use critical and logical thinking to solve problems and look beyond the roadblocks and drive team members to focus on solutions that deliver results

Ownership – The individual can be trusted and depended on to achieve goals. Should not be afraid to roll up their sleeves to get the job done. Should hold themselves and others accountable to ensure all deadlines are met.
