

# DataBricks Developer

<b>Position</b>	DataBricks Developer
<b>Location</b>	India, Remote (Work from Anywhere in India)
<b>Experience</b>	4+ Years
<b>Salary</b>	Best in the Industry

## General Description

We are looking for the DataBricks Developer to join Agilité to build data warehouse and data lakes and publish collated data from internal and external sources. Relevant experience in Data Engineering/Data Warehousing design and development experience in developing products in cloud computing ecosystem.

## Work Experience Required

- Data ETL for AWS Databricks using AWS Data Pipeline and PySpark and Scala
- Data Quality and cleaning using PySpark Scripts/Scala
- Data Quality and Data Validation using Comparison testing of very large datasets.
- Design and development of RDBMS and No Sql DBMS
- Design of Business Intelligence applications and Customer Analytics with Tableau and Power BI BI platforms
- Working in a fast-paced Agile SDLC framework
- Deployment, triaging and troubleshooting customer reported issues and Production Support.
- Good to have experience in Healthcare analytics and Product Development ecosystem
- Ability to design architecture from ground up and transform legacy code environments.

## Educational Qualification

- Bachelor of Technology or Master's degree in Computer science or IT

## Required Competencies

- Delivered products/data streams in Big Data solutions using Hadoop and Spark with Databricks
- Proven experience working with AWS Data bricks, AWS EMR, Spark SQL with Amazon S3, the Hadoop Distributed File System (HDFS), and Amazon DynamoDB in AWS Datawarehouse.
- Ability to translate current legacy code/platform to cloud solutions for scale and performance.
- Experience in developing solutions using Scala Scripting, Python, Pyspark and Spark SQL with Data bricks
- Strong Data warehouse knowledge with Hadoop Distributed File System and DynamoDB.

- Knowledge on analytic models to consume unstructured and structured data
- Advanced SQL skills & stored procedures.
- Optimizing queries and performance tune for millions of data tuples
- Must have experience in Data Mapping and ETL programming from multiple sources to datalake on cloud
- Exposure to Customer driven analytics would be preferred.

### Core Competencies

**Collaboration** – Even though this may be an individual contributor role, success lies in ensuring that the individual is able to work collaboratively across levels and functions. The individual must communicate with peers and clients effectively and ensure timely closure of tasks

**Outcome Oriented** – Must ensure that the focus is not on hours of productivity but instead on outcomes delivered. The individual should constantly and consistently put effort to ensure goals are met in a timely fashion with high quality. Must use critical and logical thinking to solve problems and look beyond the roadblocks and drive team members to focus on solutions that deliver results

**Ownership** – The individual can be trusted and depended on to achieve goals. Should not be afraid to roll up their sleeves to get the job done. Should hold themselves and others accountable to ensure all deadlines are met.
