

Consultant, Robotic Process Automation (RPA)

Position	Consultant, Robotic Process Automation (RPA)
Location	India, Remote (Work from Anywhere in India)
Experience	3+ Years
Salary	Best in the Industry

General Description

We are looking for creative, technical problem solvers to join our Automation practice that advises clients on the use of Robotic Process Automation (RPA) and Cognitive Technologies to achieve business outcomes such as cost reduction, capability enhancement and risk mitigation.

Our RPA consulting team in Bangalore interfaces with ISG teams in North America and Europe to design, develop and deploy RPA solutions for clients globally utilizing RPA software such as Automation Anywhere, Blue Prism, UiPath and others.

Work Experience Required

- Understands software development methodology, configuration management and lifecycle
- 1-2 years of experience with one or more of the following is required:
 - Business process automation
 - Professional services
 - Robotic process automation
 - Shared services, back office or financial work processes
- Experience with the one or more of the following is required:
 - RPA software tools (e.g., Automation Anywhere, Blue Prism, UiPath, etc.)
 - Cognitive software tools
 - C# and/or Java, html, css
 - Microsoft Technology (VB .NET, Windows, Internet Explorer, SQL Server, Web Services)
 - Scripting languages (e.g., python, perl, powershell, bash, vbs, etc.)
- Certification in one or more of the following is preferred:
 - Automation Anywhere
 - UiPath
 - Blue Prism
 - Work Fusion

Educational Qualification

- Bachelor of Technology or Master's degree in Computer science or IT or Business Degree.

Required Competencies

Position Responsibilities:

- Develops and configures automation processes as per the solution design document (SDD) to meet the defined requirements.
- Approaches development from a modular point of view, ensuring reusability and ease of maintenance
- Configure/develop in accordance with best practices ensuring a reliable and hardened automation
- Perform testing of the solution in accordance with standardized test practices
- Support teams during UAT and Production/Pilot phases
- Work within project planning constraints, communicating any identified project risks and issues to the delivery/project manager accordingly and providing inputs to the change control process
- Maintain documentation according to firm standards, best practices and standard operating procedures

Attributes

- Self-motivated, team player, action and results oriented
- The ability to methodically solve business and technical problems using innovative and well-planned approaches with well documented, supportable and extensible developments
- Ability to facilitate effective interaction between clients, suppliers, and ISG colleagues.
- Excellent written and verbal communication skills, including good client interaction skills with the ability to present technical details to a non-technical audience as well as produce clear and concise written documentation
- An understanding of, and a willingness to adhere to, formal change control procedures and disciplines.

Core Competencies

Collaboration – Even though this may be an individual contributor role, success lies in ensuring that the individual is able to work collaboratively across levels and functions. The individual must communicate with peers and clients effectively and ensure timely closure of tasks

Outcome Oriented – Must ensure that the focus is not on hours of productivity but instead on outcomes delivered. The individual should constantly and consistently put effort to ensure goals are met in a timely fashion with high quality. Must use critical and logical thinking to solve problems and look beyond the roadblocks and drive team members to focus on solutions that deliver results

Ownership – The individual can be trusted and depended on to achieve goals. Should not be afraid to roll up their sleeves to get the job done. Should hold themselves and others accountable to ensure all deadlines are met.
