

# Data Engineer - Developer

<b>Position</b>	Data Engineer - Developer
<b>Location</b>	India, Remote (Work from Anywhere in India)
<b>Experience</b>	5+ Years
<b>Salary</b>	Best in the Industry

## General Description

We are looking for the Data Engineer – Developer to join Agilité to build data warehouse and data lakes and publish collated data from internal and external sources. The data engineers shall slice and dice and customize data streams and views for publishing with internally developed focus products for target customers.

The data engineer must be able to function effectively in a high-volume, rapid delivery environment in which publicly available data must meet data, security and accessibility specifications without fail.

## Work Experience Required

- 5+ years of experience in creation/managing data warehouse frameworks using scripting and data pipelines
- 5+ traditional and cloud-based data warehouse environments
- Knowledge of data pipelines using traditional ETL tools
- Expert level writing complex SQL queries
- Analyze, troubleshoot, and document problems/observations
- Validate data of incoming streams including integrity and consistency coming into our Data store / Data lake

## Educational Qualification

Bachelor of Technology or Master's degree in Computer science or IT

## Required Competencies

- RDBMS
- SQL Server
- Complex Queries
- Performance tuning of SQL queries
- Database objects
- SSIS
- SSRS
- Requirement analysis

## Core Competencies

**Collaboration** – Even though this may be an individual contributor role, success lies in ensuring that the individual is able to work collaboratively across levels and functions. The individual must communicate with peers and clients effectively and ensure timely closure of tasks

**Outcome Oriented** – Must ensure that the focus is not on hours of productivity but instead on outcomes delivered. The individual should constantly and consistently put effort to ensure goals are met in a timely fashion with high quality. Must use critical and logical thinking to solve problems and look beyond the roadblocks and drive team members to focus on solutions that deliver results

**Ownership** – The individual can be trusted and depended on to achieve goals. Should not be afraid to roll up their sleeves to get the job done. Should hold themselves and others accountable to ensure all deadlines are met.
