Residents and property owners,

A couple of updates of current projects in town. The secondary well drilling was completed a few weeks ago. The location is behind our job shop on Lakeview. The pump crew is currently working on the pump and the well house. Once this is complete we will have two wells that will alternate filling our water tower and will avoid an emergency if one of them were to be out of service. This project will hopefully be completed in the next month or so and I'm proud to announce it has been covered by a Federal grant along with ARPA money from the state.

We have also been recently notified that the state has approved money to make some much needed road repair. I want to personally thank our Vice Mayor, Harry Leuer and our State Representative, Steve Massengill for their efforts in this matter. Without both of them this would never have happened. More information will follow concerning this project and the timeline. I just wanted all to know it's in the works.

Regards,

**Doug Irby, Mayor
Snow Lake Shores, Mississippi**
