

Envirosolve has over 25 years' experience specializing in source emissions testing for a wide variety of requests including, but not limited to:

- **Certificate of Approval Compliance Testing**
- **CEMs RATA Testing**
- **Regulation 419 Testing**
- **NPRI Air Testing**
- **Pollution Control Efficiency Testing**
- **Screen Level Pollutant Testing**

Envirosolve has extensive experience in providing air testing services following approved reference methodologies (Environment Canada, Ministry of Environment, Environmental Protection Agency, Ministry of Labour) as required by industry and/or governing regulatory bodies including, but not limited to:

- **Acid Gas Anions**
- **Aldehydes**
- **Ammonia**
- **Combustion Gases (O₂/CO₂/CO/NO_x/SO₂/THC)**
- **Halides (hydrogen bromide, hydrogen chloride, hydrogen fluoride)**
- **Halogens (bromine, chlorine, fluorine)**
- **Hexavalent Chromium**
- **Multiple Metals including Lead/Mercury**
- **Odours**
- **Total Suspended Particulate - Particle Size Determination (PSD) - PM_{10/2.5} Determination**
- **Semi-Volatile Organic Compounds (SVOCs) - chlorobenzenes (CBs), chlorophenols (CPs), polyaromatic hydrocarbons (PAHs), polychlorinated biphenyls (PCBs), dioxins/furans (PCDDs/PCDFs)**
- **Total Reduced Sulphur Compounds**
- **Volatile Organic Compounds (VOST)**
