

Free services, such as healthcare and education, in the midst of a socialist society is like a bread line in an empty grocery store; it serves only as a distraction from the misery of daily life.

What good is healthcare that won't heal? What good is education that is government propaganda?

The people suffer while the rulers live in luxury.

WHY YOU NEED TO WEAR A MASK!

Avoid identification from government, activist lawyers, and other enemies.

Individuals in the National Capitalist movement should wear a mask for the simple reason that they do not need to be identified. They are concealing their faces and their appearances because big governments have security cameras everywhere. Activist lawyers wearing green hats are filming them with the intent to sue, even when they are simply defending themselves. The list goes on.

In his world where cameras sit on every street corner, where leftist thugs, communist secret services and political police use every chance they get to profile us, where participation in social struggle or public demonstrations can compromise our freedom and ability to act in the future, there is no reason to make their jobs easier for them.

Just as we refuse to cooperate with government interrogations and police investigations, we're also going to make it as hard as we can for the systems of social control to crack down and break our great movement.

Developing a practice of (partial) anonymity at demonstrations opens up space for participation in actions for people who would otherwise be risking "too much" – be it legal status, employment, or family safety.

Not only does it make profiling more difficult, it also helps to keep people out of police custody, where Marxists torture and kill.

Police, community snitches, and even federal intelligence agencies will have a much harder time identifying masked faces when they are making their most wanted lists than those without masks.

This is one of the biggest mistakes that those on the right make... they won't mask up!

They do battle with masked activists, or they protest, and at the end of the day it is only *their* face that is on video, surrounded by a sea of masks.

Wearing masks won't get us home safely all the time, but it is amazing how that thin layer of cloth, worn over our head, can disrupt routine communist oppression and social control, even in the face of advanced technology and firepower.
