## Intermediate students

Once students get to the Intermediate levels, classes are no longer offered in combination but rather separate by discipline. Many students continue to take all ballet, tap, and jazz classes which is great however, it does not have to be all or nothing. Don't care for tap? Don't take it. Don't have time for jazz? You don't have to. If you take pointe or jazz, you DO have to take ballet though. That is the only requirement

The schedule for the coming year is out and registration is open. We hope that you will join us for the 2025-2026 season of dance! Please note that it is completely normal for students to spend two years in the same level. We have at least 2 curriculums for each level so it will never be a repeat of the same class. Please note that the schedule has changed slightly from last month. Thank you to those in our Child 1&2 classes that answered our survey. The schedule is always a puzzle to be solved so we appreciate and value your input.
