## THERMAL BROKEN ALUMINUM PROFILE

---

Our Thermal Broken Aluminum Profiles offer superior insulation, reducing heat transfer and ensuring stable indoor temperatures, which significantly lowers energy costs.

## EXTRAORDINARY SEALING STRIPE

---

The specially developed sealing strip has the effect of double layer sealing, and the margin of clearance can be adjusted, which is convenient to install and has excellent performance.

## Multi-Point Linkage Locks

Manual  Electric

Our Multi-Point Linkage Locks offer both mechanical and electric options for ultimate protection. Featuring three locking points (top, middle, bottom), they ensure a firm and secure closure.

**Mechanical Option** Reliable and durable, the mechanical lock provides traditional security with long-lasting performance.

**Electric Option** For advanced convenience, the electric lock integrates with smart home systems, offering remote control access and monitoring.

Perfect Pivot Sealing

## AUTOMATIC REBOUND DROP SEALING

As your door gracefully closes, our innovative sealing strip descends effortlessly, forming a dual barrier against the elements. With each opening, it ascends just as smoothly, ensuring unobstructed entry and exit while maintaining the integrity of your home's security and energy efficiency. Experience the future of home protection with our automatic sealing technology today.

## THERMAL INSULATED & ENERGY SAVING

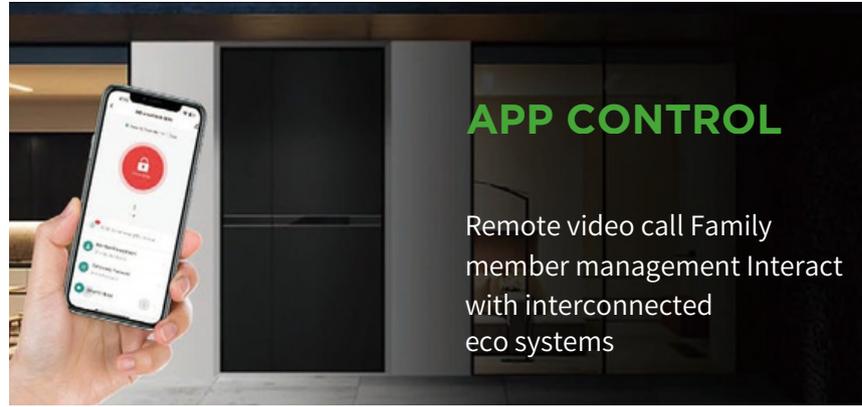

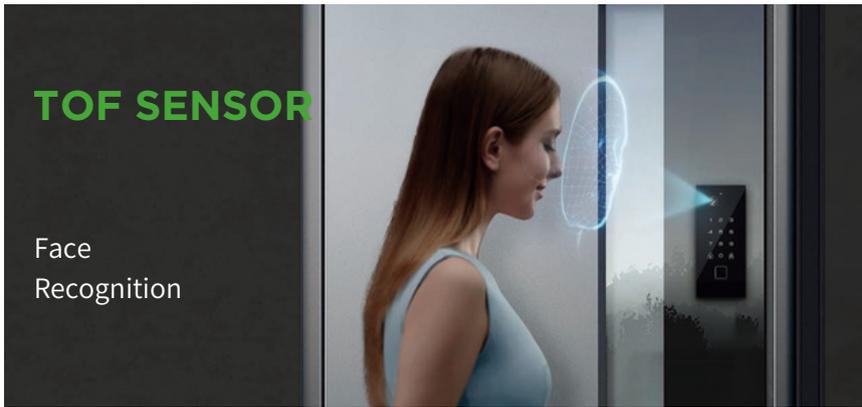

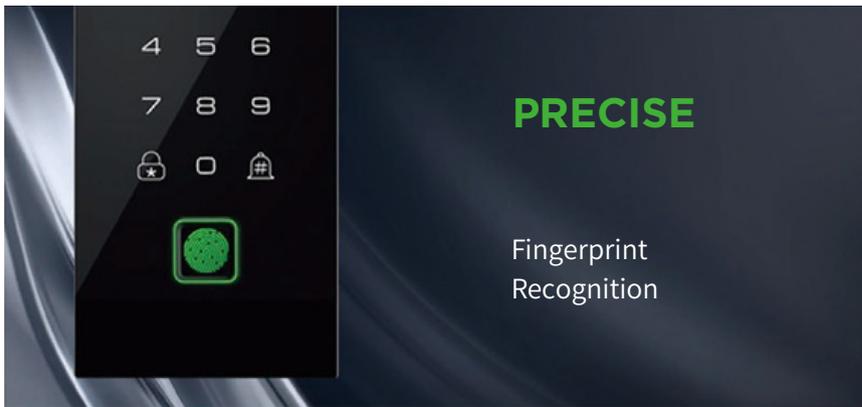

When your door closes, advanced hidden seals automatically descend, compressing against the track to create a dual cavity seal. This ingenious design effectively blocks air and water infiltration, ensuring energy efficiency and thermal insulation. Not only does it save on energy costs by keeping the warmth in and the cold out, but it also significantly reduces noise pollution, creating a peaceful sanctuary right at your doorstep. With our doors, you're not just making an entry – you're securing a fortress of comfort and tranquility.
