STEP 1: WHAT ARE YOU INTERESTED IN?

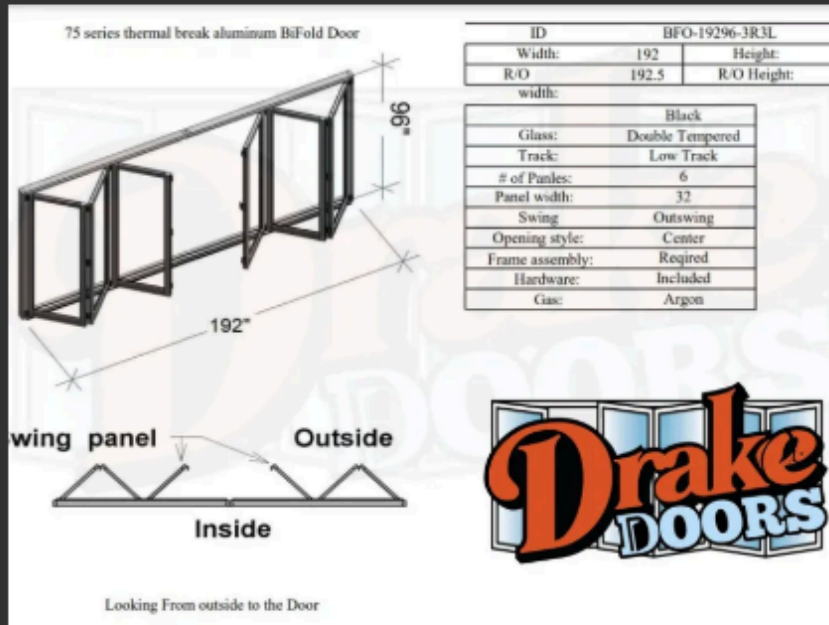

Discuss your requirements, style preferences, and functionality with our design team. Tell us your needs and preferences (style, material, functionality, budget). Take precise measurements of the installation space to ensure the doors will fit properly in your space.

Ordering Process

STEP 2: RECEIVE QUOTE AND SPECS.

After you provide specifications and select all desired custom options, we will send a quote detailing costs, estimated delivery times, and payment terms. Review the quote and make any necessary adjustments. Approve the final design and price. Place the order by finalizing the payment and ensure all details are confirmed. Once we receive payment and design confirmation production is next.

STEP 3: PROCUCTION & TESTING.

The doors are crafted by skilled artisans with over 15 years of experience, ensuring high-quality workmanship based on your specifications. You will receive pictures of the finished door to keep you informed throughout the process. After fabrication, a quality control inspection will be conducted to ensure everything meets the required standards. Once quality checks are complete, the door will be carefully packaged for delivery.

STEP 4: PACKAGING & SHIPPING.

Your doors will be packed in wood crates, steel frames, and industrial-strength extra-thick stretch wrap, which will protect them from accidental damage during transportation. Our team will send you pictures of your package followed by tracking information so your informed.

STEP 5: CUSTOMER SERVICE.

We do not offer installation but our team is here to answer any questions you may have. Our manufacturer can provide videos to help address any issues your installer may have to ensure the best customer service in the door industry.

STEP 6: ENJOY FOR YEARS TO COME!

Our customer service doesn't stop after the sale because we're here to assist you throughout the lifetime of your door. We are always just a phone call, text, email, or a chat away during this journey together! We thank you for choosing Drake Doors!
