

CACTUS

FLOW CONTROL

RED IRON BROCHURE

Cactus Flow Control was founded on the premise of building a high quality American made product at an economical price. Traditional American manufacturing has not always been a cost-effective option. Our goal is to change that. At Cactus, we believe you shouldn't have to choose between American made and affordable.

Our manufacturing facility is located in Houston, Texas, where we build and inventory a wide range of high-quality red iron products. At Cactus Flow Control, we are transforming American manufacturing and critically looking at every aspect to maximize quality and value.

HAMMER UNIONS

2" and 3" Figure 1502 unions are available in Threaded, Butt Weld Schedule XXH, and Butt Weld Schedule 160. Unions are available in Standard and NACE options.

PLUG VALVES & REPAIR KITS

We stock large quantities of 2 x 1, 2 x 2, and 3 x 3 Figure 1502 Plug Valves and Repair Kits. Plug Valves and Repair Kits are interchangeable with most major manufacturers. Available in Standard or NACE.

Quality is purpose driven.

CROSSOVERS & PLUGS

We manufacture and stock all standard Crossovers, Swages, and Bull Plugs. Autoclave taps, and custom sizes/configurations are available up to 5" Figure 1502. Available in Standard or NACE.

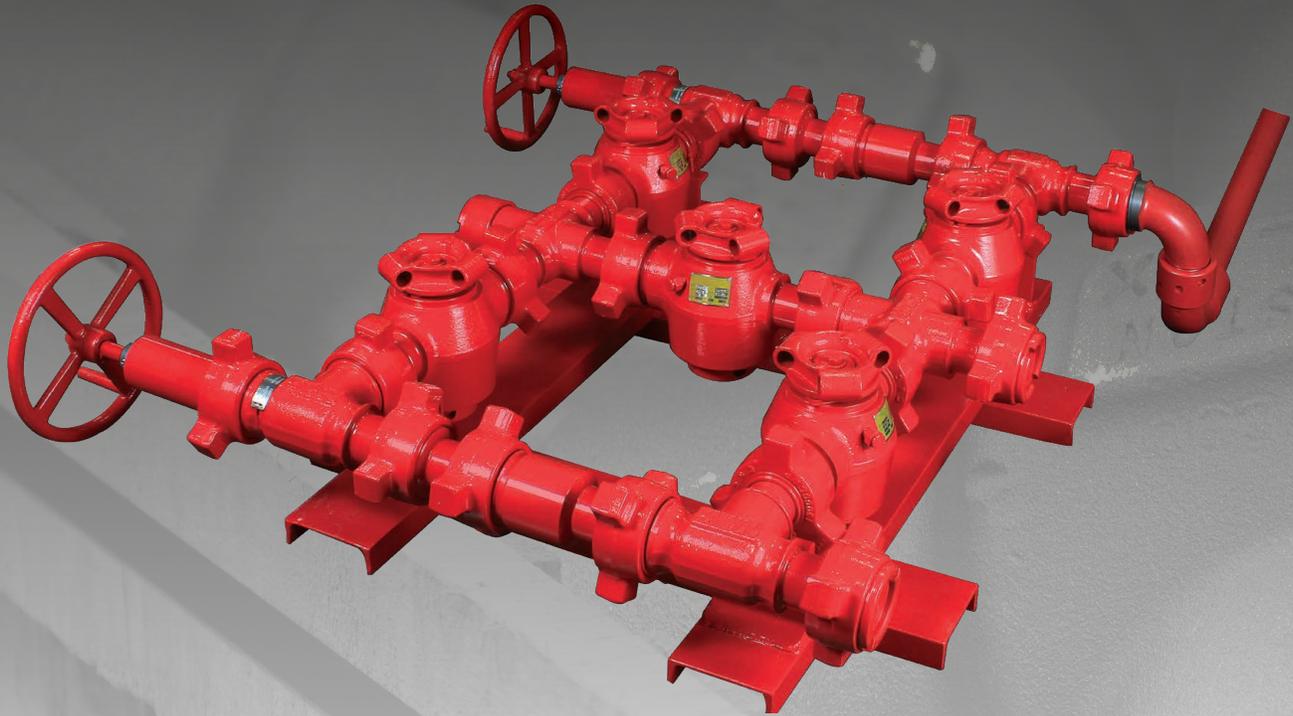

INTEGRAL FITTINGS

Tees, Ells, and Crosses available in standard configurations. Custom sizes and configurations are available upon request, including Reducing Tees. Available in Standard or NACE.

MADE IN THE USA

Products built to your requirements.

Plug Valve Manifolds are available upon request. From 4-Valve to 9-Valve Manifolds, we can build and customize your manifold to exact specifications. Available in Standard or NACE.

We stock large quantities of Plug Valves in a wide range of styles and sizes. Plug Valves are available in 2x1, 2x2, and 3x3 (Standard and NACE). Our Plug Valve Repair Kits are interchangeable with most major manufacturers.

Integral Hose Loops are available in 2" x 10'. Ask us for details!

MADE IN THE USA

A close-up photograph of a person's hand operating a complex industrial machine. The machine has a yellow component at the top and a dark, metallic body. The hand is positioned on a handle or lever. Below the machine, a cylindrical metal part is visible, resting on a base. The background is dark and industrial.

The best way to
predict the future is
to create it.
